

PIXEL MANGO
DIGITAL GROWTH PARTNERSHIP

PROPOSAL 2026

GHOROA

Building a digital foundation for 40 years of heritage.

CLIENT
Tamjid Hossain

BUSINESS
Ghoroa Restaurant

DATE
July 28, 2026

PREPARED BY
Pixel Mango

SUMMARY

GHOROA's digital opportunity.

GHOROA is a 40+ year heritage restaurant with a loyal customer base. Much of today's online ordering runs through third-party platforms — valuable for reach and delivery, but costly in margins and customer ownership.

We're not replacing those platforms overnight. We're building GHOROA's own digital ecosystem to:

- ✓ Create a premium online presence
- ✓ Enable direct customer ordering
- ✓ Build long-term customer relationships
- ✓ Reduce dependency on third-party platforms
- ✓ Lay the foundation for future growth

CURRENT CHALLENGES

Where GHOROA is today.

Business

- Heavy reliance on FoodPanda
- Platform commissions reduce profitability
- No direct customer ownership
- No customer database

Technology

- Limited online discoverability
- No online ordering platform
- No restaurant dashboard
- Manual order management
- No customer analytics

Brand

- No cohesive digital identity
- No social media presence
- Heritage story is not communicated

PROJECT VISION

GHOROA's first Direct Ordering Platform.

Rather than building another FoodPanda, Pixel Mango proposes building GHOROA's first Direct Ordering Platform — delivered in stages to reduce risk and validate adoption.

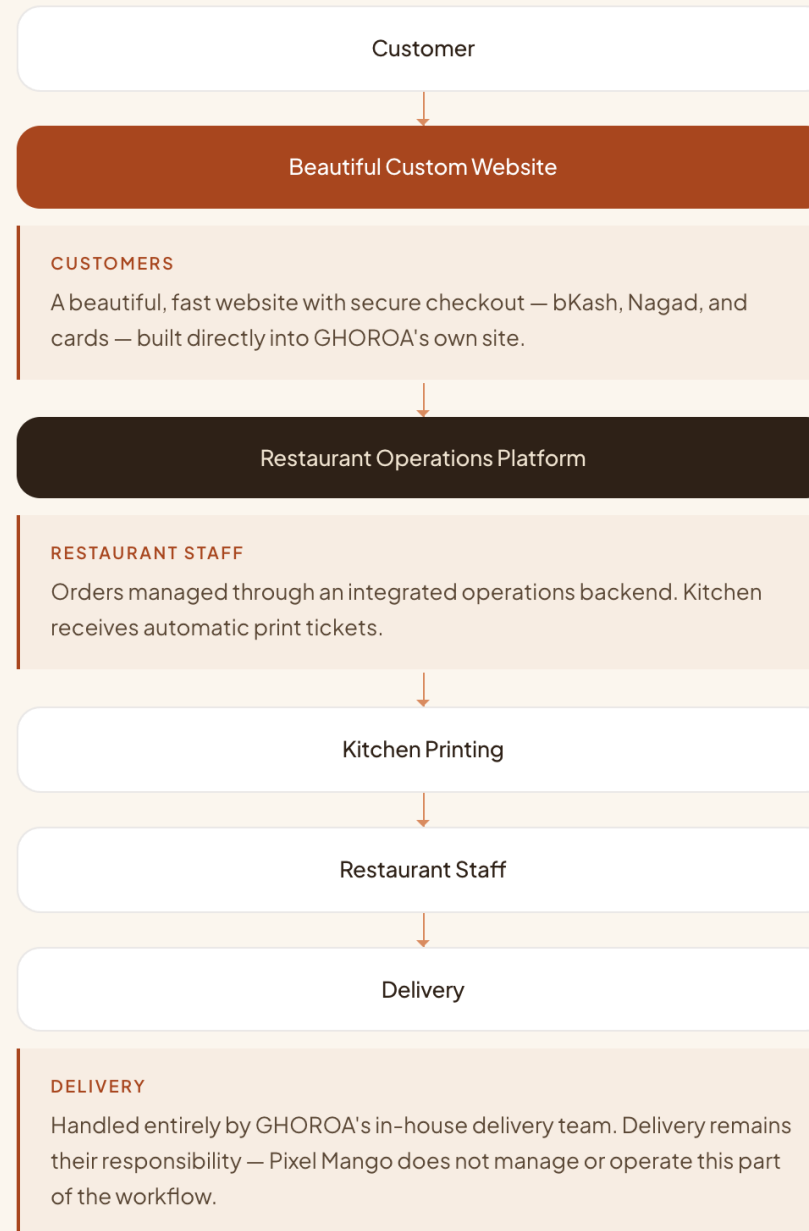

CURRENT FLOW — VIA FOODPANDA

GHOROA never owns the customer relationship. Every order pays platform commission. No direct data, no loyalty, no control.

OUR SOLUTION

A Digital Restaurant Platform

Two stages. One platform.

We don't build everything at once. We launch a strong foundation first — then unlock ordering and operations after we validate customer demand.

PHASE 1 — FOUNDATION

Own the presence.

Brand, website, content, and SEO — so GHOROA owns a premium digital presence customers can find and trust.

- Brand identity & guidelines
- Website, content & SEO
- Extensible architecture
- Built to expand later

Outcome: a deep foundation customers can find — ready for ordering on top later.

PHASE 2 — ORDERING & OPERATIONS

Own the order.

System + Awareness. Direct ordering on GHOROA's site — plus marketing that drives customers back to it.

- Cart, checkout & payments
- Kitchen printing & staff dashboard
- Hosting & maintenance
- Social, email & campaigns

Outcome: customers order online — and keep coming back.

Phase 1 service breakdown.

Every deliverable included in the foundation investment — nothing hidden.

SERIAL	SERVICE	DESCRIPTION	COST
01	Brand Identity	Full visual identity for a 40-year heritage restaurant — positioning, wordmark, color & type system, and a digital look that feels like GHOROA, not a generic food brand. Includes packaging design concepts and mockups (takeaway bags, boxes, sleeves, and related applications), research, multiple concept directions, and 3 revision rounds until it is right.  Primary + secondary marks · packaging concepts & mockups · JPG, PNG, SVG, PDF · editable source files	₹12,000
02	Business Card Design	Professional business card designed to match the finished brand system — clean hierarchy, print-safe layout, ready for local printers.  Print-ready PDF · 3 design options	₹3,000
03	Brand Guidelines / UI UX	Figma guideline covering logo usage, typography, palette, spacing, and core UI patterns. These guidelines feed directly into website development — so the site is built from the same system, not designed twice or reinvented in code.  Figma file · applied as the source of truth for website UI	₹8,000
04	Social Media Profile & Cover Images	A consistent profile and cover set across Facebook, Instagram, LinkedIn, and WhatsApp — so every channel looks like the same GHOROA, not four different brands.  4 profile pictures · 4 cover images (PNG) · sized per platform	₹3,000
05	Website Development	Custom website built from the brand guidelines — not a template. Pages: Home, Menu (Breakfast / Lunch / Dinner), About, Contact, Locations, FAQ, Privacy Policy, and Terms. Built bilingual (Bangla & English), mobile-first, SEO-ready, with Google Maps and Google Business integration.  Live website · responsive across devices · CMS-ready content structure	₹1,20,000
06	Website Content Writing	Original website copy written in GHOROA's heritage tone — menu item descriptions, About story, FAQ answers, and key page text that sounds like the restaurant, not stock AI filler. Edited for clarity, SEO, and brand voice.  1,200–3,000 SEO-friendly words across products, pages & FAQs	₹6,000
07	Privacy Policy	A clear, restaurant-ready privacy policy drafted for the GHOROA website, then reviewed by a lawyer — so how you handle customer data, rights, and brand-related intellectual property is documented properly from day one, not left as a placeholder page.  Draft privacy policy · lawyer-reviewed final version for the site	₹6,000
08	SEO Setup	Technical and on-page SEO so GHOROA can be found when people search locally — titles, meta, structure, and keyword targeting around the restaurant (not generic food-blog spam).  SEO report · all key pages optimized · local keyword set	₹10,000
09	Extensible Architecture	The strategic core of Phase 1: a deep technical foundation under the website — information architecture, data shape, and platform structure designed so ordering, payments, kitchen printing, and a staff dashboard can be layered on later without tearing the site down. This is what makes the next round growth, not a rebuild.  Extensible codebase & structure · Phase-2-ready foundation	₹32,000
Phase 1 Total		One-time investment · 6–8 weeks	₹2,00,000

You're not just buying pages. You're investing in a foundation — Phase 2 (ordering, operations, marketing) plugs into this base when GHOROA is ready.

A premium first step, built to expand.

INVESTMENT

₮2,00,000

6–8 Weeks

One-time Payment

A deep digital foundation for GHOROA —
built so ordering, operations, and growth
can be added later without starting over.

01

Brand Identity

02

Business Card Design

03

Brand Guidelines / UI UX

04

Social Profile & Covers

05

Website Development

06

Website Content Writing

07

Privacy Policy

08

SEO Setup

09

Extensible Architecture

System + Awareness.

A platform without traffic sits empty. Marketing without a place to convert wastes money. Phase 2 builds both — so GHOROA can take orders and keep customers coming back.

SYSTEM

Website Ordering

The engine that lets customers order directly from GHOROA — and lets the restaurant run those orders day to day.

- Full cart & checkout
- bKash, Nagad & card payments
- Kitchen printing & staff dashboard
- Order & menu management
- Hosting, security & maintenance

Outcome: GHOROA owns the order — not FoodPanda.

AWARENESS

Digital Marketing

Even the best system needs people to know it exists. Marketing reminds customers, raises awareness, and drives them to order directly.

- Social media content & campaigns
- Email marketing & newsletters
- Promotions that drive repeat orders
- SEO & local discoverability
- Monthly strategy & reporting

Outcome: more people find GHOROA — and remember to order direct.

Built to Grow

Possible future expansions — not included in Phase 1 or Phase 2. Added whenever GHOROA decides to grow further.

Loyalty Program	Gift Cards	QR Ordering	Table Reservations
Customer Accounts	Multi-Branch Management	Franchise Dashboard	CRM Integration

These are future investments that integrate seamlessly into the platform — no rebuild required.

WHY THIS APPROACH

Build the right foundation first.

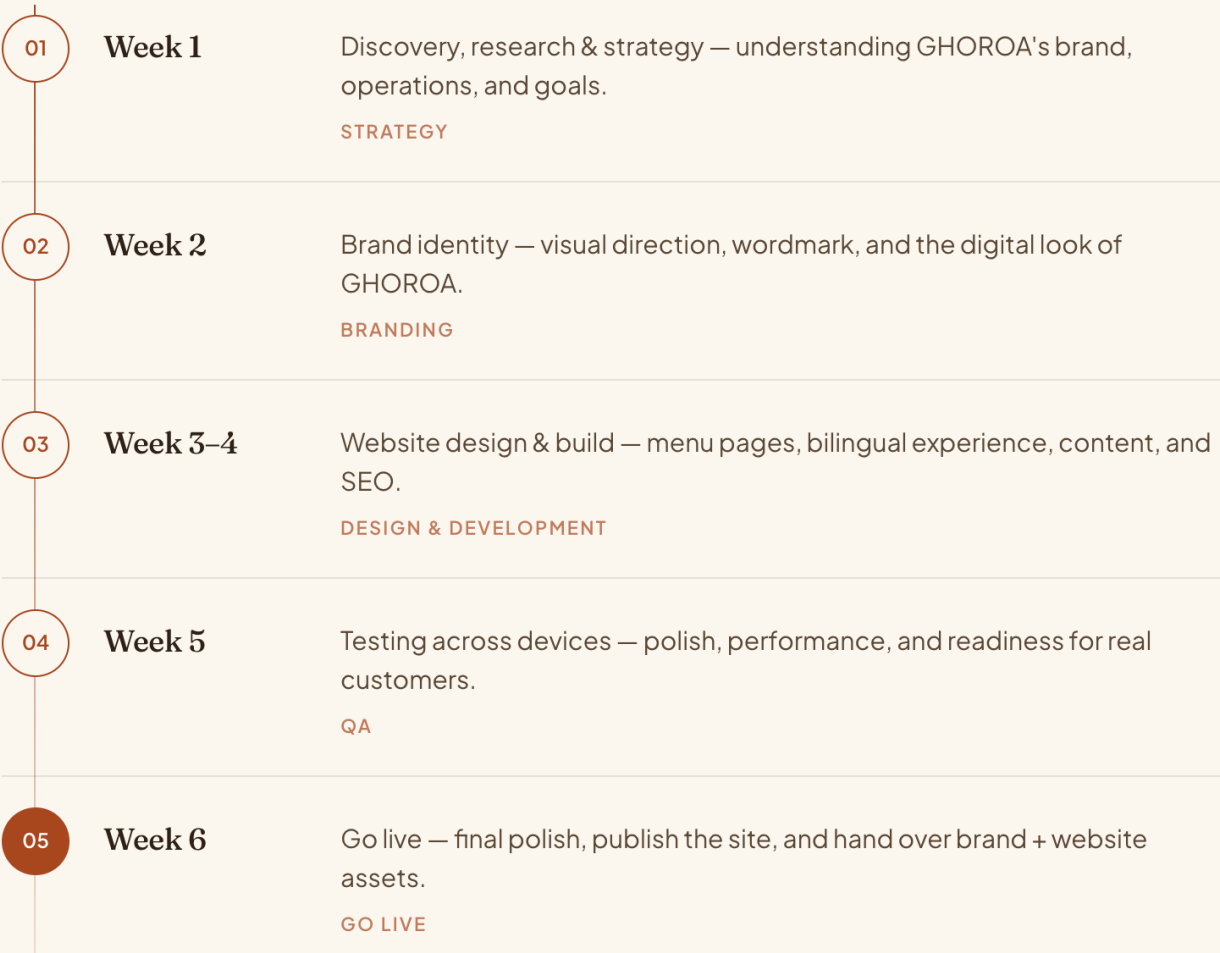

Instead of building everything today, we build the right foundation first. This keeps the initial investment manageable while ensuring every future improvement integrates seamlessly.

The business evolves without rebuilding.

PROJECT TIMELINE

6–8 weeks to launch.

Phase 1 Foundation **Discovery → Go Live**

INVESTMENT

Start focused. Scale when ready.

PHASE 1 — COMMIT NOW

Foundation Platform

Brand, website, content, SEO — plus an extensible architecture built for what comes next.

₮2,00,000

One-time · 6–8 weeks

PHASE 2

Ordering & Operations

System + Awareness — direct ordering, payments, kitchen tools, maintenance, social & email marketing.

Scoped after Phase 1

Priced when you're ready

PHASE 3

Growth & Expansion

Loyalty, multi-branch, apps, and deeper automation — added whenever GHOROA decides to grow further.

Quoted separately

Based on scope

No obligation to continue past Phase 1. Every next stage is optional — and builds on what you already own.

LET'S BUILD TOGETHER

More Than a Website.

We're not here to deliver a website and disappear. We're here to become GHOROA's long-term digital partner.

Together we'll build a platform that grows with the business, strengthens customer relationships, and increases direct revenue for years to come.

PIXEL MANGO × GHOROA
